Rebuilt Outsole Stitcher

Accommodates Multiple Users in High-Volume

Landis K Specifications

- Dimensions: 35" W x 61" H x 35" D
- Net Weight: 620 Lbs.
- Voltage: 115 Volts

Landis L Specifications

- Dimensions: 812mm W x 1549mm H x 762mm D (32" x 61" x 30")
 - Net Weight: 351Kg (775 Lbs.)
 - Voltage: 115 Volts
- SKU: LANDISK or LANDISL

The Rebuilt Landis K or L Outsole Stitcher has been a prime favorite among shoe repair craftsmen for many years because of its all around efficiency and capability of producing excellent work. This rebuilt stitcher allows its owner to save thousands of dollars without sacrificing quality.

The Rebuilt Rapid E Model 317 is a unique outsole stitcher. Unlike a Landis, this machine features a hydraulic presserfoot, which creates a more even pressure on the sole when sewing different thicknesses. It has less of a curvature to its needles allowing it to handle sewing up to 7/8" thick, making it ideal for today's heavy boots.

Specifications

- Dimensions: 851mm W x 1499mm H x 851mm D (33-1/2" x 59" x 33-1/2")
- Net Weight: 279Kg (617 Lbs.)
- Voltage: 115 Volts
